

INSIGHT

About

The INSIGHT product provided by Elsym provides for the collection of sales and prize winnings from different CGS providers and consolidates it into a single reporting solution. Each CGS is balanced and verified independently by an ICS, then data is collected by INSIGHT to report combined information to Lottery backend systems. All data collection and distribution are fully automated, along with automated event driven notifications.

- Collects sales and prize winning data by date, game, and draw from different CGS providers (i.e. traditional retail and iLottery)
- Provides for combined data reporting and distribution to Lottery backend systems such as general ledger and website
- Automated event notifications such as combined draw sales and total draw liability
- Web portal used to monitor and review all data collection and reports
